Re: Reeves Contracting Company
Past Job Performance

Dear Mr. Mayo:

We are sending this letter to recommend Reeves Contracting Company as a prequalified contractor with the Georgia Department of Transportation. Some examples of our experience with Reeves are shown as follows:

1) **Project #1:** Grady Redevelopment – Atlanta, GA

Type of Work Performed: Reroute combined sewer system with 58" x 96" elliptical pipe, demolition and reconstruction of storm systems, water systems, connections to active sewers, sanitary bypasses, dewatering, new granite curbing, granite retaining walls, street widening, parking lanes, bicycle lanes, paving, hardscapes, striping, signage, bollards and site furnishings.

Quality of Service Provided/Level of Cooperation in Project Completion: We are very pleased with their high level of professionalism and cooperation. The whole Reeves team created and maintained a positive, can-do atmosphere that helped us to provide the best possible product for our owners and customers.

Work Completion Schedule: The work was completed within the scheduled time allowed.

2) **Project #2:** College Town Phase II Public Improvements – Atlanta, GA

Type of Work Performed: Demolition and reconstruction of storm sewers, water systems, tie to existing active sewer systems, new granite curbing, street widening, parking lanes, paving, hardscapes, striping and signage.

Quality of Service Provided/Level of Cooperation in Project Completion: Their team met every challenge presented and they showed exemplary leadership throughout the project duration.

Work Completion Schedule: The work was completed within the scheduled time allowed.

3) **Project #3:** Harris Homes/Dean Rusk Park – Atlanta, GA

Type of Work Performed: 53,597 cubic yards of earthwork, construction of a 4 acre lake for storm water retention, numerous retaining walls, stone fascias, architectural concrete finishes, fountains, mechanical floating netted trash trap, concrete/brick pavers, park and site furnishings, landscaping, irrigation, fencing, lighting, 84" to 60" combination sewer reroute, connections to active sewer trunk lines, dewatering and bypasses.

Quality of Service Provided/Level of Cooperation in Project Completion: The Reeves Contracting team provided a high level of quality in the construction of this project. Reeves kept IBG's management team informed on construction progress and responded timely in addressing unanticipated situations.

Work Completion Schedule: The work was completed within the scheduled time allowed.

4) **Project #4:** Capitol Gateway Community Park – Atlanta, GA

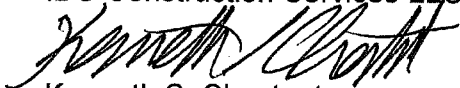

Type of Work Performed: Public improvements for approximately 5-1/2 blocks within the Capitol Gateway Community including, but not limited to: streetscapes; roads; utilities; storm water detention pond with curved retaining walls, architectural veneer and surrounding amenity park area and upgrading of two City of Atlanta combined sewer trunk lines; site grading and building pad preparation.

Quality of Service Provided/Level of Cooperation in Project Completion: The experienced personnel at Reeves always ensured that the schedule would be maintained properly and job quality plus field working conditions would be at their best.

Work Completion Schedule: The work was completed within the scheduled time allowed.

Please contact us if you have any questions regarding this letter.

Sincerely,
IBG Construction Services LLC
