Re: Reeves Contracting Company
Past Job Performance

Dear Mr. Mayo:

We are sending this letter to recommend Reeves Contracting Company as a prequalified contractor with the Georgia Department of Transportation. Some examples of our experience with Reeves are as follows:

1) **Project #1:** Grady Redevelopment – Atlanta, GA

Type of Work Performed: Reroute combined sewer system with 58" x 96" elliptical pipe, demolition and reconstruction of storm systems, water systems, connections to active sewers, sanitary bypasses, dewatering, new granite curbing, granite retaining walls, street widening, parking lanes, bicycle lanes, paving, hardscapes, striping, signage, bollards and site furnishings.

Quality of Service Provided: Reeves Contracting has competently completed this project and shown the ability to deal with difficult and adverse field conditions which often occur when rebuilding areas with existing infrastructure.

Work Completion Schedule: The work was completed within the scheduled time allowed.

Level of Cooperation in Project Completion: The team at Reeves works with the owners and engineers with a strong commitment to obtain exceptional results.

2) **Project #2:** College Town Phase II Public Improvements – Atlanta, GA

Type of Work Performed: Demolition and reconstruction of storm sewers, water systems, tie to existing active sewer systems, new granite curbing, street widening, parking lanes, paving, hardscapes, striping and signage.

Quality of Service Provided: Reeves Contracting has competently completed this project and shown the ability to deal with difficult and adverse field conditions which often occur when rebuilding areas with existing infrastructure.

Level of Cooperation in Project Completion: The team at Reeves works with the owners and engineers with a strong commitment to obtain exceptional results.

Work Completion Schedule: The work was completed within the scheduled time allowed.

3) **Project #3:** Harris Homes/Dean Rusk Park – Atlanta, GA

Type of Work Performed: 53,597 cubic yards of earthwork, construction of a 4 acre lake for storm water retention, numerous retaining walls, stone fascias, architectural concrete finishes, fountains, mechanical floating netted trash trap, concrete/brick pavers, park and site furnishings, landscaping, irrigation, fencing, lighting, 84" to 60" combination sewer reroute, connections to active sewer trunk lines, dewatering and bypasses.

Quality of Service Provided: Reeves Contracting has competently completed this project and shown the ability to deal with difficult and adverse field conditions which often occur when rebuilding areas with existing infrastructure.

Level of Cooperation in Project Completion: The team at Reeves works with the owners and engineers with a strong commitment to obtain exceptional results.

Work Completion Schedule: The work was completed within the scheduled time allowed.

Please contact us if you have any questions regarding this letter.

Sincerely,
J. LANCASTER ASSOCIATES, INC.
