Re: Reeves Contracting Company
Past Job Performance

Dear Mr. Mayo:

We are sending this letter to recommend Reeves Contracting Company as a prequalified contractor with the Georgia Department of Transportation. Our experience with Reeves is shown as follows:

Project: McDaniel Glenn Redevelopment – Atlanta, GA

Type of Work Performed: Underground storm water detention structures, demolition and reconstruction of storm systems, water systems, tie to existing active sewer systems, new granite curbing, granite retaining walls, street widening, parking lanes, bicycle lanes, paving, hardscapes, striping, signage, bollards and site furnishings.

Quality of Service Provided: Reeves provided experienced and well-qualified professionals to the project that ensured a high level of quality in the construction of this facility and minimized the amount of inspection items that needed to be resolved after field visits.

Work Completion Schedule: The work was completed within the scheduled time allowed.

Level of Cooperation in Project Completion: Throughout the project, Reeves kept us informed, on a timely basis, on construction progress, critical path items and any requests to solve unanticipated situations. When appropriate, meetings were requested by them to review complicated design elements of that these elements were constructed quickly, correctly and efficiently.

Very truly yours;
Kimley-Horn and Associates, Inc.

Emmy Montanye, P.E.
Associate
